Easy in every way!

The BE Flexible is the ergonomic must-have for your workplace.

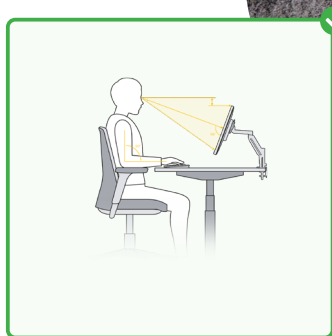

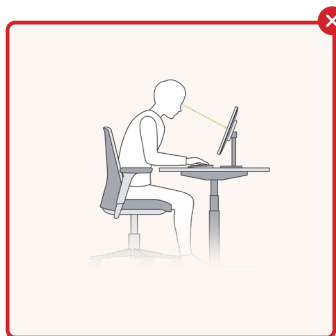

A monitor arm designed with all the features you need to do your job to the best of your ability. It is equipped with the latest innovative technologies and is also quick and easy to install. The entire monitor arm is made of 72% recycled material and is 100% recyclable.

How to adjust your screen to the right height.

Many professionals have monitor arms, but may not be utilising them effectively.

Key factors to be considered when adjusting a monitor arm:

1. The height of the screen should be set so that the viewing angle is 10-20° below eye level.
2. The distance from the screen should be at least 60 cm (one arm length).

BE Flexible

As a monitor arm should be

B Banner

72% recycled
100% recyclable

Adjustment has never been so easy
via a practical rotary knob with acoustic
feedback on the mechanical spring

Mechanical spring instead of a gas spring.

Uses a mechanical spring which retains its
accuracy, unlike a gas spring, which loses its
strength over time.

Weight indicator.

Never argue with your screen again,
adjust the mechanical spring to
the weight of your screen, 2-10kg
weight range.

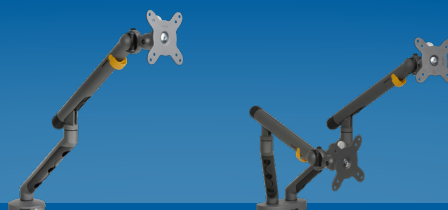

VESA quick-release fastener

Integrated cable management.

Installation from top to bottom.

No more crawling under your desk to
mount the screen. Installation is
simple, using top-down clamping or
screw-through mounting.

**Rotates 360
degrees**

Available in the following models: Single Dark Grey - Dual Dark Grey
