# PROTECT YOUR PEOPLE. PROTECT YOUR BUSINESS.

People who work with their hands on a daily basis rely on good skin condition. Damaged and broken skin does not just affect your workers' skin health, it can have a detrimental impact on work productivity.

Developed by SC Johnson Professional, the 3-Moments for Skin Care shines a spotlight on the three key moments when workers should apply skin care products.

Our goal is to help you implement a full skin care programme, including skin care products and education, to help your workforce maintain healthy skin year round. Skin protection and restoration creams have a huge role to play.

Contact dermatitis accounts for 95% of occupational skin disorders.\*

80% of all cases of contact dermatitis are caused by cumulative exposure to weak irritants\* like the ones that many industrial workers come into contact with every day.

Each case of dermatitis has the potential to cost an employer up to £6000.
